U.S. Department of Energy  
Washington, D.C. 20585**

In the Matter of:

**Zoe Industries, Inc.**

)  
)  
) Case Number: 2010-SW-1602  
)  
)

**REQUEST FOR DATA**

**Date issued:** March 2, 2010

On October 22, 2009, the Department of Energy (DOE or the Department) received a complaint regarding Zoe Industries showerhead model "Nautilus II Showerbuddy" or model number 520522. The complaint alleges that testing of this model demonstrated that it exceeds the Federal maximum water flow rate requirement.

DOE's regulations for enforcement, contained in 10 CFR § 430.70, state that DOE may conduct enforcement testing of a covered product upon receiving information in writing that a particular covered product may not be in compliance with the applicable performance standard. The first step of this procedure is for the Department to examine the manufacturer's test data.

In accordance with 10 CFR § 430.62(d), the Department requests that Zoe Industries submit the test data, including a complete test report, for model 520522 to Laura Barhydt via email at [Laura.Barhydt@hq.doe.gov](mailto:Laura.Barhydt@hq.doe.gov), no later than March 15, 2010. If you would like to meet with representatives of the Department to discuss the compliance of these models, please suggest a suitable date.

Companies are prohibited from distributing in commerce any covered product not in compliance with the applicable DOE energy conservation standard. Any person who knowingly violates this provision may be subject to fines of up to \$200 per violation, i.e., per product distributed in the United States. 42 U.S.C. 6303.
